

Homework Week 1 Wednesday

Solve each equation by add/subtracting the constant on both sides of the equation and then multiply/dividing by the coefficient on both sides of the equation (Show your work)

$$\textcircled{\text{P}} \quad 3n + 8 = 20$$

$$\textcircled{\text{I}} \quad 7x - 2 = 61$$

$$\textcircled{\text{C}} \quad -5u + 6 = 41$$

$$\textcircled{\text{S}} \quad 2d - 9 = -29$$

$$\textcircled{\text{W}} \quad -4y + 16 = 4$$

$$\textcircled{\text{A}} \quad -8t - 23 = -15$$

$$\textcircled{\text{N}} \quad \frac{x}{2} + 7 = 11$$

$$\textcircled{\text{J}} \quad \frac{k}{9} - 1 = 10$$

$$\textcircled{\text{V}} \quad \frac{m}{-4} + 5 = 14$$

$$\textcircled{\text{K}} \quad \frac{v}{-6} + 2 = -1$$

$$\textcircled{\text{H}} \quad \frac{n}{8} - 3 = -11$$

$$\textcircled{\text{O}} \quad \frac{w}{-5} + 17 = -3$$
