

Homework Week 2 Thursday

Solve each equation by destroying the fractions

$$13) \frac{3}{2}n + \frac{9}{4} - 1 = -1$$

$$15) r + \frac{1}{3} - \frac{8}{5} = \frac{22}{5}$$

$$17) -\frac{5}{2}n + \frac{5}{4}n = -\frac{1}{2}$$

$$19) \frac{3}{2}n - \frac{15}{4}n = \frac{21}{4}$$

$$21) -\frac{1}{4}n - n = -\frac{5}{6}$$
