

## Homework Week 3 Monday - Solving Multi-Step Equations

1.  $8 + 6 = -p + 8$

2.  $-7 + 8x - 4x = 9$

3.  $8x - 6 - 8 - 2x = 4$

4.  $6(m - 2) = 12$

5.  $5(2c + 7) = 80$

6.  $5(2d + 4) = 35$

7.  $3(x + 1) = 21$

8.  $7(2c - 5) = 7$

9.  $6(3d + 5) = 75$

10.  $4 - 14 = 8m + 2m$

11.  $-1 = 5p + 3p - 8 - p$

12.  $5p - 8p = 4 + 14$

13.  $2p - 4 + 3p = -9$

14.  $-8 = -x + 5 - 1$

15.  $12 = 20x - 3 + 4x$
